Secure storage and flexible protection for industrial and warehouse applications.

Available Ex-Stock for immediate delivery.

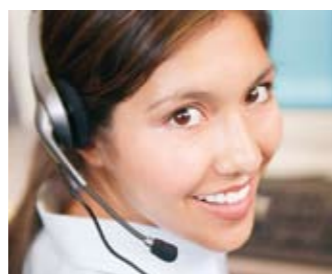

Troax Mesh Partition System:
Products are easily profiled to ceilings, roofs and building structures.

▶ **Secure storage made easy with the flexible Caelum mesh system from Troax.**
Troax understands the need for security in manufacturing plants, retail and logistics industries and has become a trusted supplier through an extensive nationwide network of local distributors.

▶ **Industrial Wall for Factory and Warehouse Applications.**
Enclosures can incorporate sliding or hinged single or double doors. Applications can be multi-tiered to provide access for forklifts and pallet trucks. A variety of locking options for doors are also available.

▶ **Optimize your storage space with a tailor-made design.**

Whether you require partitioning for a simple enclosure, or one for higher security, Troax can provide an **Ex-Stock** solution for most applications.

▶ **Simplicity**

Troax make it easy...

Troax supply Ex-Stock a designed solution using CAD and can undertake the installation as well.

In fact, Troax will oversee the entire process from start to finish, ensuring a simple and hassle-free experience.

▶ **Quality Assurance**

Troax product quality is world renowned with both UK and Swedish plants and distributor divisions operating to ISO 9001 standards and accreditations.

There is constant momentum with Research & Development, allowing the customer and end-user to be assured of a consistency and reliability associated with the Troax brand.

▶ **Service**

With a network of nationwide distributors, Troax are never far away.

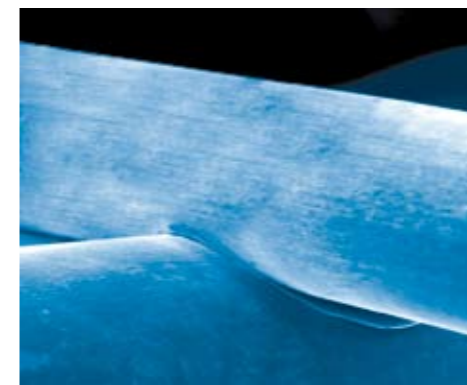

This is backed up by our two sales offices, factory and distribution centre, along with all our field-based personnel.

Ex-Stock availability and rapid response deliveries are part of our complete customer care package.

▶ **Versatility**

The *Caelum* system is designed to suit your specific requirements.

Choose between *Caelum UR350* and *UX450* panels to create secure storage in a variety of applications, including enclosures and wall division for aerosols, cosmetics, tobacco, liquor, electronic components, pharmaceuticals and other high-value goods.

▶ Troax use certified welding techniques to fix each and every wire to the panel frame.

▶ You can use both *Caelum UR350* and *UX450* to create dividing walls.

▶ For mezzanine floors, using *Caelum UX450* provides added security.

▶ **Applications**

The Troax *Caelum* partitioning system is ideal for sub-dividing storage areas, creating secure storage for hazardous and/or high value goods, bonded storage, or for segregating electrical controls.

Hazardous goods such as aerosols or high value goods such as factory equipment, alcohol, tobacco, etc. can all be stored in clear view. The 50 x 50mm mesh aperture prevents pilfering. 100 x 50mm and 25 x 25mm mesh panels are also available.

It is a highly adaptable, modular panel system that offers a flexible solution to meet your requirements.

Right: *Caelum* partitioning in a typical application securing computer servers. Floor space is maximised by inward-facing fixings, which also eliminates the hazard of tripping.
