

AVANTA

CASE STUDY

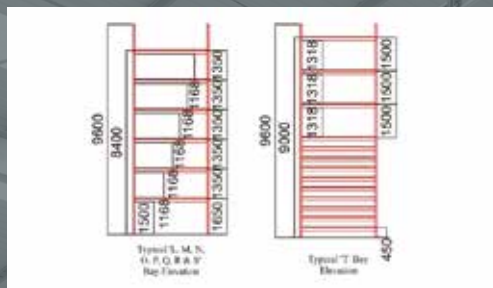

Adjustable Pallet Racking Project

For the new site in Wellingborough, Northamptonshire Avanta UK were approached to offer a competitive storage solution to store multiple paper products from office paper, boards, and packaging materials. All stored on pallets with various different pallet types.

The solution offered was a standard wide aisle 9.6m high adjustable pallet racking system configured with five different bay profiles to suit the different pallet sizes, the quantities to store and the handling equipment employed.

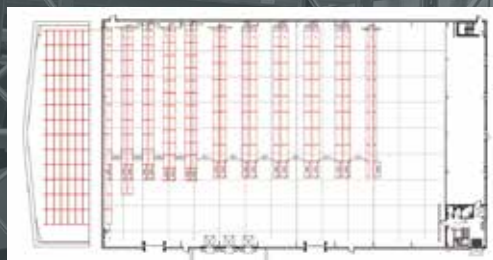

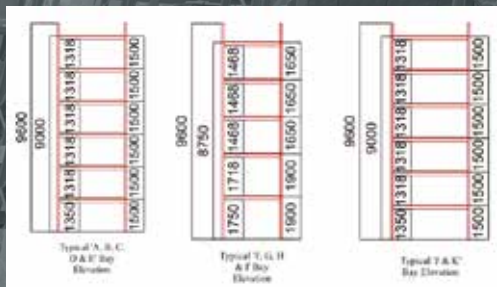

Combining different rack frame depths and beam capacities using a racking system that is adjustable on a 50mm pitch.

Avanta supplied and fitted open boarded timber decks as the perfect decking material to spread the weight loading of the pallets.

Steel tubular rack end guards were floor fixed to offer protection to the racking structure. As standard, load warning notices were issued and fixed to rack ends.

The project was completed in the set required time for the warehouse to be operational as specified.

9.6M High Racking System

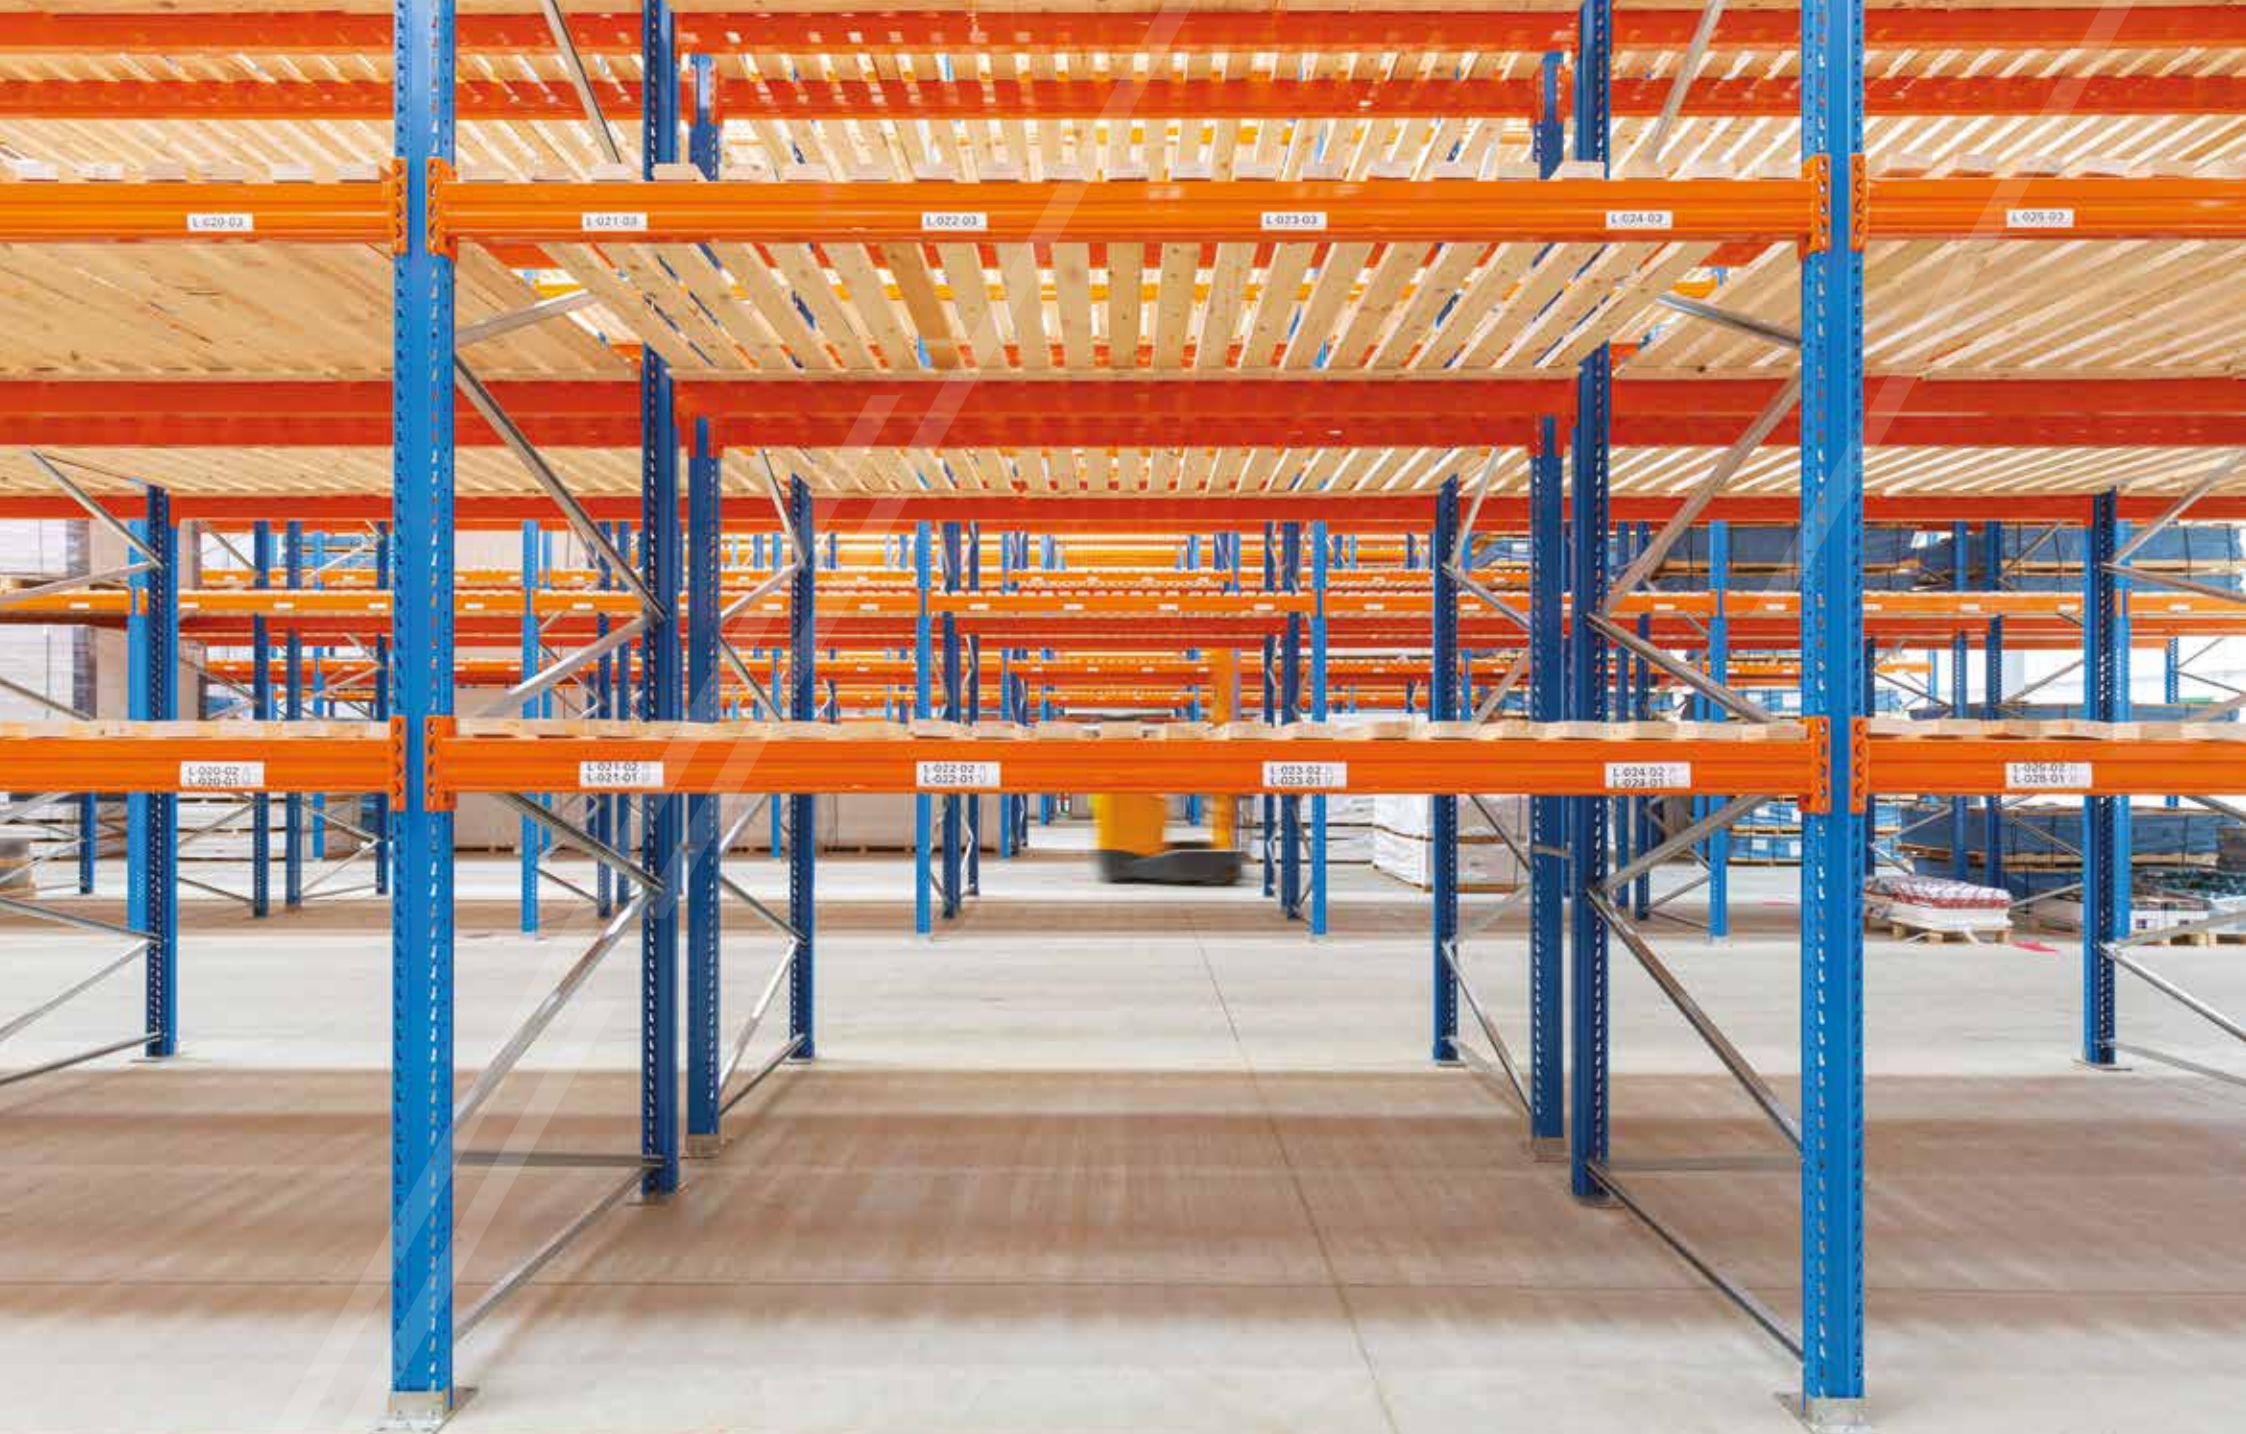

5 Different Bay Profiles

Client is UK Leading Paper Merchant

Rack End Safety Barriers Included
